Biopolymers and Biodegradable Plastics are a hot issue across the Plastics industry, and for many of the industry sectors that use plastic, from packaging to medical devices and from the construction industry to the automotive sector.

Handbook of Biopolymers and Biodegradable Plastics - 1st

This first systematic scientific reference in the area of micro- and nanostructured biopolymer systems discusses in two volumes the morphology, structure, dynamics, properties and applications of all important biopolymers, as well as their blends, composites, interpenetrating networks and gels.

Handbook of Biopolymer-Based Materials | Wiley Online Books

This volume presents the results of numerous worldwide studies focusing on the implementation of natural polymers as engineering plastics and the use of their inherent properties.

Products and Applications of Biopolymers 4 2. GA sources and processing Acacia senegal and Acacia seyal trees are the main sources of GA. These species grow naturally in the semi-arid sub-Saharan regions of Africa. There are over 1000 species of acacia and a summary of their botanical classification was reported by Phillips and Williams, 1993. Sudan has traditionally been the main GA producer ...

Title: Handbook of Engineering Biopolymers Homopolymers, Blends, and Composites Author: Fakirov, Stoyko and Bhattacharyya, Debes

Handbook of Engineering Biopolymers | HANSER eLibrary

Extensive information is included on biopolymers. The data included in the Handbook of Polymers come from open literature (published articles, conference papers, and books), literature available from manufacturers of various grades of polymers, plastics, and finished products, and patent literature.

Handbook of Polymers | ScienceDirect

Description In today's world, bioplastics are becoming increasingly prominent owing mainly to scarcity of oil, increase in the cost of petroleum-based commodities, and growing environmental concerns with the dumping of non-biodegradable plastics in landfills.

Handbook of Bioplastics and Biocomposites Engineering

Biopolymers have the potential to cut carbon emissions and reduce carbon dioxide in the atmosphere. The carbon dioxide released when they degrade can be reabsorbed by plants, which makes them close to carbon neutral.
