The style of functional programming is to describe what you want, rather than how to get it. ie: instead of creating a for-loop with an iterator variable and marching through an array doing something to each cell, you'd say the equivalent of "this label refers to a version of this array where this function has been done on all the elements."

### **What are the benefits of functional programming? - Stack**

Describing the idea as "A Personal Computer For Children of All Ages." Kay wanted the Dynabook concept to embody the learning theories of Jerome Bruner and some of what Seymour Papert" who had studied with developmental psychologist Jean Piaget and who was one of the inventors of the Logo programming language " was proposing.
