UNDERSTANDING CENTRAL HEATING SYSTEMS Dec13

The air to water heat pump absorbs the air from outside, this heat can then be used to heat your radiators, water and underfloor heating systems. Air to water heat pumps are also suitable for any business premises with high water usage.

5 best Heating Systems for Your Home in Ireland - Donegal

If your house is connected to the national gas grid, a gas-fired central heating system is usually the cheapest option for heating your home. You can save money on long-term running costs by choosing a reliable, efficient boiler when your existing model packs up.

The Best Heating For Your Home - Which?

Domestic heating by gas: boiler systems – guidance for installers and specifiers (2008 edition) 3 Home energy use is responsible for over a quarter

Domestic Heating by Gas - BPEC

As a minimum, your heating systems should be split into two independently controlled zones. They are your –Space Heating Zone–™ and your –Domestic Hot Water Zone–™. This allows you to heat your domestic hot water without being forced to turn on your space heating. It will also allow you to use your boiler to heat your hot water in the summer time, without using the immersion. Additional ...

A Homeowner’s Guide To Heating Controls - seai.ie

Your central heating system plays an important role in your home - keeping you supplied with the heat and hot water that make life so much more comfortable.

Central heating systems: what kinds are there available?

Heating system controls regulate when the various components of the heating system turn on and off. The most important control from your standpoint is the thermostat, which turns the system – on or at least the distribution system – on and off to keep you comfortable. A typical forced air system will have a single thermostat. But, there are other internal controls in a heating system, such as ...

Types of Heating Systems | Smarter House

At its simplest level, think of a heating system in two parts: the bit that generates the heat, and the bit that distributes that heat around your home. You should also, at this early stage, understand that heat is required in two forms – for space heating (i.e. keeping you warm) and for hot water (i.e. for showers etc).
